The Convergence Resource Center is a faith-based, community service organization, established in 2004. The mission of CRC is to provide services to women who have been formerly incarcerated by administering resources with the goal of deterring re-incarceration. As part of our Customized Resource Services each woman is assigned an ART (Avoid Recidivism Track) Facilitator. We believe that each woman is a Work Of ART whom we encourage to grow intellectually, socially, emotionally and spiritually. Each work of ART and her ART facilitator (AF) identify the areas in her life that put her at risk. Alongside our Empowerment and Service Partners we aide her in re-integration. Our mission is guided by the belief that many of the challenges facing our community can best be corrected when those who live in the central city and urban communities assume greater personal responsibility for their quality of life. Services are free.

Latino Community Center (founded in 1999) offers programming in the following areas: after school academic enrichment, gang and violence diversion, recreation, youth development, prevention programming, street outreach, summer programming, and healthy girls.

Programs run not only at the Center, but also at six public schools as well as in the streets.

Programming is based on best practices in the field of positive youth development to ensure effectiveness. Structured and unstructured, bilingual and bicultural opportunities reach a wide variety of at-risk youth in the area, including gang members, young girls, out-of-school youth and teenaged males. The strength of LCC lies in a strong grassroots community approach. The

majority of the staff and volunteers were raised and continue to live in the neighborhood that it serves. The agency is made up of highly competent bicultural/bilingual staff, which is highly committed to the organization and the community.

Youth seek out the Center as a safe place where they can be with positive adult role models and stay away from dangerous situations. Surveys show participants are less likely to get involved in risky behaviors such as violence, substance use, and premarital sex, and more likely to stay connected to their families, their schools and their communities.
